

# Life Plug

*Dystopian, Post Apocalyptic, Simulation*

In *Life Plug*, Franco and Page live peaceful lives inside a beautiful virtual world built generations ago by their wealthy ancestors. Franco has rare digital abilities that let him manipulate the simulation itself, while Page believes she is simply waiting for life to begin. Their reality shatters when Page experiences a traumatic glitch that exposes the truth: their paradise is a sealed illusion, and the outside world is a nuclear wasteland.

Reeling from the lie that has shaped their lives, Page frees Franco from the digital trance he works in and pushes them both to escape Eden, the controlled environment that has kept them contained. Outside, they enter a ruined landscape filled with mutated humans, deadly factions, and digital stewards hunting them to return them underground.

Franco and Page must learn to survive in a world they were never meant to see. Franco's extraordinary abilities, once used to shape virtual fantasies, become useless in the real world, while Page's fear transforms into fierce determination. Together they navigate treacherous terrain, decipher who among the mutants they can trust, and evade those who want their untouched bodies for themselves.

*Life Plug* is a tense and emotional story of escape, truth, survival, and the rediscovery of what it means to live in a world stripped of illusion.
